### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with applicant's representative, Sanders Hillis, on 11/28/07.
3. The application has been amended as follows:
  - in claim 1, in line 8, after "output signal", add ---where the first audio signal and the second audio signal are digitally processed simultaneously by the digital signal processor;-----,
  - cancel claim 5,
  - in claim 18, line 3, after "first tuner", add -----configured to produce a first tuner output, wherein the first tuner is-----,
  - in claim 18, line 6, after "second tuner", add ---configured to produce a second tuner output-----,
  - in claim 18, line 10, after "configured to", add ---digitally process the first tuner output-----,
  - in claim 18, line 13, after "setting", add -----,where the digital signal processor digitally processes the first tuner output and the second tuner output simultaneously-----.
  - in claim 42, line 3, delete "radio" and add ----radio tuners----

- in claim 42, line 4, add --- simultaneously digitally processing the first and second radio audio signals to generate respective first and second digitally processed audio signals;-----.
- in claim 42, line 6, delete ---generating respective first and second digitally processed audio signal based on the respective first and second radio tuner audio signals;-----.

***REASON FOR ALLOWANCE***

4. Claims 1-4, 6, 8-9, 11-12, 15-18, 20-22, 26-27, 29-30, 35, and 42-46 are allowable over the cited prior art.
5. The examiner's amendment above is made to put the claims in condition for allowance.

The following is an examiner's statement of reasons for allowance:

The cited prior art, Kelley (JP 05-183461), discloses one tuner with different station selections whose outputs are multiplexed and then demultiplexed for input into accumulators and a digital processing system for demodulation.

Utsunomiya (JP 06-204926) discloses a double tuner diversity RDS receiver wherein a microcomputer chooses a better tuner via a switch in response to the data obtained from the RDS data demodulators, PLL circuits, and the detectors.

However, the cited prior art fail to disclose a first and a second tuner whose outputs of a first and a second audio signal are digitally processed simultaneously by a digital signal processor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
